

ELECTIONS SASKATCHEWAN

Area of New Constituencies

March 2015

Introduction

There will be 61 constituencies in the 28th General Election, an increase of three from the 27th General Election.

Elections Saskatchewan (referred to in legislation as “The Office of the Chief Electoral Officer”) is the province’s independent, impartial election management body. With a legal mandate established by the Legislative Assembly of Saskatchewan, it plans, organizes, conducts and reports on provincial electoral events.

The Saskatchewan Constituency Boundaries Commission works independently in the province to propose new constituency boundaries and consults with Saskatchewan residents to create the new electoral map for their province.

Redistribution

Electoral boundaries are reviewed and revised every 10 years. This allows for changes in the province’s population to be reflected in the representation in the Legislative Assembly of Saskatchewan.

The two northern constituencies (Athabasca and Cumberland) are outside the scope of the Commission. Their boundaries remain intact, regardless of population changes. The southern constituencies are redistributed to, as nearly as possible, allow for an equal population in each constituency.

In 2012, the Commission proposed the redistribution of the current 58 constituencies to a revised 61 constituencies. The Legislative Assembly of Saskatchewan passed Bill 79 (The Representation Act, 2012) into law on May 15, 2013.

The new boundaries will come into effect for the 28th General Election, scheduled for either November 2, 2015 or April 4, 2016.

While the increase from 58 to 61 constituencies might seem minor, all but two constituencies have had their boundaries revised, and some have new names. This highlights the importance for voters to review their constituency information before voting in the 28th General Election. The constituency boundaries in Saskatchewan will be reviewed again in 2022.

Area of New Constituencies

This report details the geographic area of each of the 61 new constituencies as portions of the 58 former constituencies. Each new constituency, listed alphabetically, is broken down into the parts of former constituencies that comprise it. Details for these component parts are listed in both area in square kilometres and per cent of the new constituency’s total area.
